

Class 15

Women, Work, and Family

Part III — Mobilizing People and Expanding Opportunity

Women's labor-force participation, 1890-present

Female labor force participation rate, 2025

Share of the female working-age population (ages 15 and over) who are economically active (employed or unemployed).

Data source: ILO Modelled Estimates, via World Bank (2026)

Note: All figures correspond to modeled ILO estimates. Employment is defined in line with the 13th ICLS and includes the production of goods for own use, such as subsistence farming.

The gender wage gap, 1960-present

Source: U.S. Census Bureau, Current Population Survey Annual Social and Economic Supplement, Historical Income Tables, Table P-40. Full-time, year-round workers.

U.S. total fertility rate, 1909-present

Fertility rate: births per woman

The total fertility rate summarizes the total number of births a woman would have, if she experienced the birth rates seen in women of each age group in one particular year across her childbearing years.

Data source: Human Fertility Database (2025); UN, World Population Prospects (2024)
